DPDPA MASTERCLASS FOR BFSI PROFESSIONALS

 +91 8856001399

 sakshi.toprani@thedigitalfifth.com

 www.thedigitalfifth.com

1. Introduction to DPDPA and Role of DPDPA in Banking

Coverage:

- Introduction to Digital Personal Data Protection Act (DPDPA) and its relevance in the banking and financial sector
- The relevance of data protection in today's digital and regulatory landscape
- Key principles and objectives of the DPDPA
- Nature and variants of data in banking and its contextual requirements to products & journeys
- Role of data and use of analytics in banking transformation
- Strategic alignment of data governance with business goals

Expected Outcome:

- Foundation of DPDPA and its importance in protecting personal data.
- Awareness of its impact on the banking and financial sectors.

2. Deep Dive into DPDPA & Building Data Privacy and Security Framework

Coverage:

- Key data protection principles under DPDPA
- Data encryption across all stages
- Data controls (tokenization, anonymization, deletion handling)
- Consent management principles and Notice structure
- Responsibilities of banks & Financial Institutions as data fiduciaries, as well as Signification data fiduciaries
- Real-world implications for banking operations

Expected Outcome:

- Ability to implement security measures and understand compliance obligations under DPDPA.

3. Consent Management Framework and Data Subject Rights in Banking

Coverage:

- Customer-centric consent systems
- Consent tracking, withdrawal
- Data discovery through consent mapping
- Consent Management Platform
- Notice Framework & Structure, and its alignment in customer journey
- Role and implementation of Consent Manager
- Customer Portal & Data Principal Rights: access, correction, portability, erasure, grievance redress
- Case studies in banking

Expected Outcome:

- Implement transparent and effective consent management practices.

4. Data Governance Framework, DPIA and Risk Management

Coverage:

- Aligning governance policies with DPDPA
- Data classification, auditing, monitoring
- DPIA objectives, process, and considerations
- Conducting effective data audits

Expected Outcome:

- Develop or review governance frameworks to ensure DPDPA compliance.

5. Data Life Cycle Management

Coverage:

- Data stewardship and accountability
- Stages: creation to deletion
- Strategic alignment with regulatory goals

Expected Outcome:

- Understand data lifecycle governance aligned with DPDPA.

6. Implementing DPDPA in Products and Digital Journeys

Coverage:

- Understanding DPDPA compliance requirements in Products & digital Journeys
- Embedding data protection into design to implementation
- Data Processor Partnerships and Third-Party Management
- Compliance in digital services

Expected Outcome:

- Build compliant products & journeys, and setup robust partnerships and enforce third-party compliance

7. Data Breaches and Incident Management

Coverage:

- Identifying vulnerabilities
- Regulatory breach notifications
- Incident response frameworks
- Real-world examples and takeaways

Expected Outcome:

- Prepare and respond effectively to data breaches.

Who Should Attend?

- Digital Product Leader
- Technology Leaders
- Chief Technology Officer (CTO)
- Chief Information Officer (CIO)
- Chief Risk Officers
- Compliance Officers
- Legal & Regulatory Heads
- Information Security Officers
- Audit & Governance Professionals

Key Takeaways

- Comprehensive understanding of DPDPA
- Hands-on implementation frameworks
